## INTERFLEX Technical Support & Service

### Interflex Technical Sales Service Team:

Each sales team member can assist you with technical support and specification detail to make your engraving decision for your process need. Each team can perform engraving audits, measure roll statistics, and provide an on site visit. Each visit results in a deliverable electronic power point presentation with a photographic record of the visit and each roll engraving value.

The plant in Spartanburg, SC also has a technical staff that is on call and available to our customers and technical sales team to assist as needed.

### Anilox engraved cell measurement processes:

Interflex Laser Engravers utilizes several means to measure cell line count and volume. Interflex is an active member on the FTA FQC team.

1

Check tool body specifications

2

High power microscopic photos

Conventional liquid volume measurement

Electronic measurement via 3DQC & AniCam

3

Cell photo and cell audit report
